APR's **ecocomp** range of WPC products are manufactured utilising recycled and reclaimed materials. They will not rot, rust, splinter or leach chemicals into the environment, therefore providing the perfect long term, environmentally sound solution for any application.

APR's screening products offer both visual appeal and durability – and being non-toxic and splinter free, this makes APR's **ecocomp** screening ideal for open space structures such as adventure parks, playgrounds and schools.

Plus, all APR products are custom designed, engineered and manufactured in Australia to your specific needs, which means you get exactly what you need with *no waste*. They are also easy to install and require very little maintenance, if any at all.

Adelaide, South Australia

Disclaimer: Due to the use of recycled and reclaimed materials, product colours and shades can vary from time to time.

All WPC products shown in this brochure have been designed, engineered and manufactured in Australia by APR – an Australian owned and operated company.
