

APR Composites range of bollards are manufactured utilising recycled and reclaimed materials. They will not rot, rust, splinter or leach chemicals into the environment, therefore providing the perfect long-term, environmentally sound solution for delineating pedestrians and vehicles.

APR Composites extensive range of bollards offer both visual appeal and durability and include round, square and rectangular profiles. Some bollards are also offered as a hollow profile, allowing a cost-effective option which is also lighter and easier to handle.

All APR Composites products are custom designed, engineered and manufactured in Australia to your specific needs, which means you get exactly what you need with *no waste*. They are also easy to install and require very little maintenance, if any at all.

**Disclaimer:** Due to the use of recycled and reclaimed materials, product colours, shades and widths can vary from time to time.

All WPC products shown in this brochure have been designed, engineered and manufactured in Australia by APR Composites – an Australian owned and operated company.
