New Yorker Bench Seat with Arms

Features

Ideal for both residential and public spaces, the New Yorker Bench Seat will add a unique and classical theme to your open space – combining old world charm with modern materials and manufacturing methods.

APR's New Yorker Bench Seat is built to withstand the harsh Australian environment. Designed and manufactured in Australia, the New Yorker Bench Seat combines a rust-resistant powder coated cast alloy frame with durable composite slats. The slats are manufactured utilising recycled and reclaimed materials and will not rot, rust, splinter or leach chemicals into the environment, while providing the perfect long term, eco-friendly alternative to timber. They are also termite resistant, have a superior lifespan and are virtually maintenance free.

The New Yorker Bench Seat is supplied fully assembled and is easily installed by bolting down to a base plate.
