Slip Resistance Rating

The results below have been compiled after testing composite products, manufactured by APR Composites with anti-slip treatment systems applied by Swan Coatings.

All tests were completed by Independent Slip Testing Services and Stone Initiatives in a NATA accredited Slip Resistance Laboratory.

The Slip Resistance Classification is New Pedestrian Surface Materials, AS 4586-2013. The testing instrument is a Mastrad Wet Pendulum Skid Tester, NATA Accreditation, 14967.
